CW-Shiloh Radiation Protection Plan (002).docx
CW-Shiloh Rad Removal Work Plan (002).DOCX

[Redacted]

Thanks for working on this last night to make changes. I made some minor changes, none of which should cause any complications.

Unrelated to rad, the documents both had too much information which identified the property locations. Remember, this is residential property and that information cannot be included. I made these deletions, but please ensure any maps you include CANNOT identify the property locations.

I need to get this to VDH, so please try to return by noon. I already sent this to [Redacted]

Thanks for everything
Chris

Subject: Shiloh Work Plan/RPP

Updated versions attached. Once I'm in the office (about 9 AM, unless [Redacted] want to knock it out first), we can add the figures, address any additional comments, and submit a pdf version.

One note I changed – the limits for the conex box's, I adjusted to indicate that the exterior of the conex box will not exceed 2 mR (limit for public protection) and the interior will not exceed 5 mR (limit for creating a radiation area). This gives us a little more leeway in the work plan, while still keeping us below any additional signage or public exposure requirements. If anyone has any questions or concerns with this, let me know. I just don't want to unnecessarily require additional conex boxes out there.

Also FYI, I postponed my Texas work, so if things carry on past one week, I can still be down there to assist.

Thanks!
